Summary

As a web application expert developer, with more than three experience years, I had been involved in almost all development states of a project: analysis, architecture and backend and frontend development. Self-taught person in continuous training I have focused my career in the frontend technologies especially Javascript, AngularJS and Google Maps.
For last two years I have grown professionally working on international projects for companies like HP, Ryanair or Virgins Trains.

Experience

Senior Javascript Developer at Snowdrop Solutions (09/02/2015 to present)
Developer of widgets and web applications, based on Google and Javascript technologies like AngularJS and Google Maps V3.
